PROFESSIONAL SUMMARY

Software Engineer with 7+ years of professional experience designing, developing, and maintaining enterprise-grade web and financial applications. Strong expertise in .NET (C#, ASP.NET Core, Web API, MVC, Blazor) and modern frontend frameworks such as Angular and React, delivering scalable and high-performance solutions. Hands-on experience building and operating microservices and event-driven architectures across AWS and Azure, leveraging services such as Lambda, ECS, S3, RDS, Azure Functions, Service Bus, Event Hubs, Azure SQL Database, and Kubernetes, with infrastructure managed as code using Terraform and Bicep. Proven background in financial systems and fintech platforms, including secure payment integrations, banking APIs, and compliance with industry standards like PCI-DSS and OWASP Top 10. Experienced with identity and secrets management (Microsoft Entra ID, OpenID Connect, Managed Identities, Azure Key Vault) and observability tooling (Application Insights, Azure Monitor, OpenTelemetry). Solid knowledge of SQL Server, Oracle, Azure SQL, and MySQL, focusing on performance optimization, complex queries, stored procedures, and data integrity. Strong advocate of Clean Architecture, Domain-Driven Design, SOLID principles, design patterns, and Agile/Scrum methodologies, with growing use of AI-assisted development tooling to accelerate delivery. Additional experience building cross-platform mobile applications with Xamarin and integrating core business systems with ERP platforms for finance and accounting workflows.

TECHNICAL SKILLS

Backend & Frameworks: .NET (C#, ASP.NET Core, Web API, MVC), Blazor (Server & WASM), Node.js, Python, RESTful Services, JWT, OAuth, OpenID Connect, Entity Framework Core

Frontend Technologies: Angular, React, TypeScript, JavaScript, HTML5, CSS3

Mobile Development: Xamarin (Xamarin.Forms) for cross-platform iOS/Android apps

Cloud & DevOps: AWS (Lambda, ECS, S3, RDS), Azure (Azure DevOps, Boards, Azure Functions, Azure SQL Database, Service Bus, Event Hubs, Azure Storage, Redis Cache), CI/CD pipelines, Docker, Kubernetes, Terraform, Bicep, PowerShell, Bash, Cloud-based deployments

Databases: SQL Server, Oracle, Azure SQL, MySQL; advanced SQL queries, stored procedures, functions, indexing strategies, performance tuning

Architecture & Design: Clean Architecture, Domain-Driven Design, SOLID principles, Design Patterns, Microservices Architecture, Dependency Injection, C4 Models, Architecture Decision Records (ADRs)

Security & Compliance: Authentication & Authorization (JWT, OAuth, OpenID Connect), Microsoft Entra ID, Managed Identities, Azure Key Vault, Secure API design, PCI-DSS awareness, OWASP Top 10, Software Composition Analysis (SCA)

Observability & Monitoring: Application Insights, Azure Monitor, OpenTelemetry

Development Practices: Agile/Scrum methodologies, Git workflow, Jira, Unit testing (xUnit, NUnit), Code reviews, Continuous Integration, Static code analysis (SonarQube, Roslyn analyzers), AI-assisted development tooling

Enterprise Integration: ERP systems integration (policy, billing, and accounting data), legacy system modernization

Tools & IDEs: Visual Studio, Visual Studio Code, Git, Bitbucket, Azure DevOps, Docker, Postman, Swagger (OpenAPI)

PROFESSIONAL EXPERIENCE

Red Efectiva (Paynau)

Full Stack Engineer | Mexico (Remote) | *October 2024 - Present*

- Designed, developed, and maintained backend services using .NET Core (C#) and RESTful APIs to support financial transactions and business workflows
- Built and optimized microservices architectures deployed in AWS, developing serverless functions in Python for AWS Lambda alongside .NET Core services, and leveraging ECS, S3, and RDS for high availability and scalability
- Developed frontend components using React, collaborating closely with product and UX teams to deliver responsive and user-friendly interfaces
- Managed and optimized SQL Server databases, writing complex queries, stored procedures, and implementing indexing strategies for high-performance transaction processing
- Integrated secure payment solutions and third-party banking APIs, ensuring compliance with PCI-DSS and performing Software Composition Analysis (SCA) on third-party dependencies
- Implemented CI/CD pipelines and applied SOLID principles, clean architecture, and design patterns to ensure maintainable and scalable codebases
- Supported and optimized Node.js microservices, improving logging, monitoring, and system reliability
- Began adopting AI-assisted development tooling to speed up delivery and improve code review quality

Seguros Reservas

Senior Software Developer | Dominican Republic | *February 2024 - September 2024*

- Designed and developed scalable RESTful APIs using ASP.NET Core Web API to support insurance core systems and internal integrations
- Optimized SQL Server queries, stored procedures, and database performance, and migrated select workloads to Azure SQL Database to improve scalability and reduce infrastructure overhead
- Built serverless components with Azure Functions to automate internal integration workflows between core insurance systems
- Maintained and gradually modernized legacy VB.NET modules within insurance core systems, migrating key functionality to ASP.NET Core Web API
- Integrated insurance core systems with the company's ERP platform to synchronize policy, billing, and accounting data
- Implemented and maintained CI/CD pipelines using Azure DevOps, enabling automated builds, testing, and deployment
- Instrumented services with Application Insights, Azure Monitor, and OpenTelemetry to enable distributed tracing, alerting, and proactive incident detection
- Applied DevOps practices to improve deployment reliability, scalability, and system monitoring in cloud environments
- Created and executed unit tests using xUnit and NUnit to validate business logic and ensure application reliability and code quality
- Collaborated with frontend teams using Angular to deliver fast, responsive, and user-friendly interfaces
- Applied Domain-Driven Design principles and documented system architecture using C4 Models and Architecture Decision Records (ADRs) to align technical decisions with business stakeholders
- Designed and supported data analytics and processing workflows using Azure Databricks to analyze operational and insurance-related data
- Developed ETL/ELT pipelines using Apache Spark (Databricks) to transform and aggregate structured data from SQL Server

Fullstack Labs

Software Engineer | USA (Remote) | *April 2023 - May 2024*

- Developed high-performance web applications using .NET Core (C#) and Angular, following best practices for scalability and maintainability
- Designed and implemented RESTful APIs with ASP.NET Web API, ensuring efficient and secure client-server communication
- Managed and maintained CI/CD pipelines, enabling frequent and reliable releases across multiple environments
- Provisioned and managed cloud infrastructure as code using Terraform and Bicep, and automated build and deployment scripts with PowerShell and Bash
- Wrote and maintained unit tests to ensure code quality and reduce regression issues, enforcing standards with SonarQube and Roslyn analyzers
- Optimized data access through complex SQL queries and stored procedures, improving overall application performance
- Containerized applications using Docker and orchestrated deployments with Kubernetes to ensure consistency across development, staging, and production environments
- Built event-driven integrations using Azure Service Bus and Event Hubs to decouple services and support asynchronous banking and operational reporting workflows
- Participated in data processing and analytics initiatives using Azure Databricks to support banking and operational reporting

Promerica Bank

Senior Web Developer | Dominican Republic | *August 2022 - February 2024*

- Developed and maintained enterprise web applications using ASP.NET MVC (.NET Framework and .NET Core)
- Modernized legacy applications by migrating components from VB.NET and .NET Framework to .NET Core, improving performance and scalability
- Designed and optimized database objects including functions, stored procedures, and views using Oracle 11g
- Improved application performance for high-traffic banking transactions using Redis caching
- Conducted security reviews aligned with OWASP Top 10 guidelines to strengthen application security within enterprise banking standards
- Implemented secure authentication and secrets management using Microsoft Entra ID, OpenID Connect, and Managed Identities, storing sensitive configuration in Azure Key Vault
- Used Azure Storage for secure document and file management across enterprise banking applications
- Conducted requirements analysis to align technical implementations with business and operational needs
- Improved application reliability and performance through code optimization and database tuning
- Collaborated with cross-functional teams to deliver secure and stable banking solutions within enterprise standards

Mercury Solutions

Junior Software Developer → Senior Web Developer | Dominican Republic | *April 2019 - August 2022*

- Designed and developed scalable web applications using ASP.NET MVC (.NET Framework and .NET Core) to meet business requirements
- Built and maintained RESTful APIs using ASP.NET Web API for reliable client-server communication and third-party integrations
- Developed and supported Windows Services for background processing and integration with external systems
- Designed, optimized, and maintained databases using SQL Server, Oracle, and MySQL, including queries, stored procedures, and indexing strategies
- Implemented DevOps practices using Azure DevOps, managing CI/CD pipelines and supporting cloud-based deployments
- Applied OOP, SOLID principles, and dependency injection to ensure clean, maintainable, and testable codebases

- Developed Blazor Server applications and maintained legacy VB.NET Web Forms solutions for stable enterprise environments
- Built and maintained cross-platform mobile applications using Xamarin (Xamarin.Forms) to extend internal business tools to iOS and Android

EDUCATION

Bachelor's Degree in Systems Engineering
Dominico-American University (UNICDA), Dominican Republic | December 2024

Software Development Diploma
Technological Institute of the Americas (ITLA), Dominican Republic | April 2019

CERTIFICATIONS

- Python Programming - Microsoft (January 2026)
- Microsoft Technology in HTML and CSS - Microsoft (June 2018)
- Microsoft Office Specialist in Excel, Word, and PowerPoint - Microsoft (June 2018)
